

**Sampling Audit  
Galashiels Depot  
16 May 2022**

**Attendees**

Moira Malcolm (DWQR), Gordon Ferrier (SW), Stewart Bunyan (SW)

**Purpose**

Scottish Water's Scientific Services are subject to regular audit by UKAS. DWQR's scrutiny and audit of Scientific Services have mostly concentrated on the laboratory services and is now being widened to include sampling.

The purpose of this audit was to examine the sampling procedures and practices undertaken at Scottish Water's Galashiels depot at Galafoot.

**Summary**

The audit was conducted by examining the areas of the depot pertinent to the sampling team and related documentation, and by interview of the relevant individuals on site. All staff involved had good knowledge of procedures and corrective action demonstrated throughout.

DWQR makes no recommendations.
