

Broadford WTW & Broadford Mid-Skye WTW Full Water Treatment Works (WTW) Audits November 2025

Broadford WTW and Broadford Mid-Skye WTW's are small independent water treatment works located on the same site serving Broadford, Skye and the surrounding areas. Full technical audits were carried out as each works had experienced microbiological failures in summer 2025..

Both water treatment works were operating well at the time of the audit and overall the works are well maintained and managed by Scottish Water's staff.

DWQR identified fourteen findings, mostly relating to routine maintenance tasks the site specific disinfection plan. Proposed interventions to address DWQR's findings, along with completion dates and any interim mitigations that will be put in place have been agreed with Scottish Water.

DWQR will monitor completion of agreed interventions, and may request evidence of completion or re-visit the site.
