Dear Peter

Regulation 27 letter 2/2008

APPROVAL OF FILEDER FILTERS FOR THE PURPOSES OF TESTING

I refer to my letter to George Ponton dated 21 September 2007, which gave approval to Scottish Water to use Filerder Filters under regulation 27(4)(c) of the Water Supply (Water Quality) (Scotland) Regulations 2001 for the purposes of testing or research for a period of 8 months from the date of that letter.

I understand that the process of obtaining full approval under regulation 27(4)(a) is taking longer than expected, so in the continuing interests of protecting public health, I have decided to extend the period for which Filerder Filters can be used for the purposes of testing and research for a further 4 months from the date of this letter.

There is still the possibility that the product may not be approved, so I would remind Scottish Water of the need to consider what alternative action it would take at the works where Filerder Filters are installed, and at any other works where it was planning to install this product, should the application for full approval be unsuccessful.

Any queries regarding the content of this letter should be addressed in the first instance to Philip Anderson (0131 244 0188).

Yours sincerely

COLIN MCLAREN
